

Release Notes

Improved Point of Sale Load Times

General Overview

Currently, certain drop-down filters in the Office Portal consist of nested filter options. These include the "Products", "Inventory", and "Purchases" views under SETTINGS > POINT OF SALE, and the TRANSACTIONS > Gateway Transactions view. For some filters (such as the Categories and Vendors in the "Products" view), this can increase the time it takes to load the menu if there are a large number of options.

The purpose of this task is to update these views to make the nested filter options into separate filters.

NOTE: Currently, the "Gateway Transactions" view is only available for specific customers using the Stripe Payment Gateway in Canada, UK, Singapore, and Hong Kong.

How will this benefit me?

By separating these nested filters, we will standardize the filter options across the Office Portal and help prevent longer load times for these menus.

Where will I see these changes?

These changes will affect the Office Portal, specifically the "Products", "Inventory", and "Purchases" views under SETTINGS > POINT OF SALE and the TRANSACTIONS > Gateway Transactions view for customers who have a Stripe Payment Gateway configured.

What is being changed/added?

- SETTINGS > POINT OF SALE > PRODUCTS
- SETTINGS > POINT OF SALE > INVENTORY
- SETTINGS > POINT OF SALE > PURCHASES
- TRANSACTIONS > GATEWAY TRANSACTIONS
 - Note: Currently, this view is only available for specific customers using the Stripe Payment Gateway in Canada, UK, Singapore, and Hong Kong.

How does this work with existing settings?

This update does not change any settings; it simply updates some current filter options in the Office Portal to change how they are displayed.
