

Release Notes

Updates to Skills Page

General Overview

Currently, the SKILLS Page/Skills Activity Log does not have a Location switcher. This was originally expected behavior as skill evaluations themselves are not Location-specific and are linked to the student. However, the Class/Camp lists provided for filtering ARE Location-specific and these cannot be easily changed as it requires navigating back to a page that has a Location toggle and changing it there, then switching back to the SKILLS Page/Skills Activity Log.

The purpose of this task is to update the SKILLS Page/Skills Activity Log to add a Location toggle that will allow staff members to more easily switch Locations as needed.

How will this benefit me?

Adding a Location toggle to the SKILLS Page/Skills Activity Log will allow staff members to more easily switch Locations as needed.

Where will I see these changes?

These changes will affect the Office Portal, in particular the SKILLS Page/Skills Activity Log.

What is being changed/added?

We are adding a Location toggle to the SKILLS Page/Skills Activity Log.

How does this work with existing settings?

If a staff member changes the Location using the switcher on the SKILLS Page/Skills Activity Log, that Location selection will be carried over if they switch to a different page (as per current behavior on other pages)
