

# Release Notes

## Enrollments Page Filter Update

### General Overview

Currently, iClassPro offers a Tuition Override Report (STU-17) that allows you to locate students who have/have had a tuition override on their enrollment. However, there are no filters in place to easily locate these enrollments.

The purpose of this task is to add a new filter to the ENROLLMENTS page to show only enrollments with a Tuition Override. This will make them easier to locate in case they need to be manually updated to change the tuition amount and/or expiration date.

### How will this benefit me?

The addition of this filter to the ENROLLMENTS page will make it easier to locate enrollments with a Tuition Override in case they need to be manually updated to change the tuition amount and/or expiration date.

### Where will I see these changes?

These changes will affect the ENROLLMENTS page in the Office Portal.

## What is being changed/added?

This update will add a new filter option to the ENROLLMENTS page to "Show Only Enrollments With a Tuition Override." If this filter is enabled, the system will only display enrollments within the defined "Enrollment Between" date range with a tuition override in place.

## How does this work with existing settings?

This update adds a new filter option to the ENROLLMENTS page. It does not add any additional settings or change the functionality of existing filters.
