

Release Notes

Improvements to Pre-Filter Behavior on FAM-2/FAM-3 Reports

General Overview

By design, the "Pre-Filter" area of "Class/Camp Filters" for reports should ONLY affect the list of classes/camps displayed to be selected and SHOULD NOT affect the report results themselves. However, this is not how they are currently implemented on the Family Phonebook Report (FAM-2) and Families Email List Report (FAM-3).

This task aims to update/improve the Pre-Filter behavior and to introduce additional filter options to the "General Filters" section. We will also be adding a "No Instructor Attached" option to the "Choose Instructors" filter.

How will this benefit me?

The purpose of this task is to update/improve the Pre-Filter behavior and to introduce additional filter options to the "General Filters" section. We will also be adding a "No Instructor Attached" option to the "Choose Instructors" filter.

Where will I see these changes?

These changes will only affect the Family Phonebook Report (FAM-2) and Families Email List Report (FAM-3).

What is being changed/added?

- Adding an additional "Choose Instructors" filter to the "General Filters" area to allow filtering the report results to only classes/camps to which specific instructors are assigned.
- Adding an additional "Class/Camp Status" filter to the "General Filters" area to allow filtering the report results based on the Active/Inactive status of the classes or camps.
- Adding a "No Instructor Attached" option to the "Choose Instructors" filter to allow you to filter results to only include classes to which no Instructor has been assigned.
- Updating filter behavior so selections made in the "General Filters" area will affect the options available for pre-filters in the "Class/Camp Filters" area.
 - For example, if multiple instructors are selected in the General Filters, only those instructors will be displayed in the "Class/Camp Filters" pre-filter options. Only the status options selected in the "Class/Camp Status" filters area will be available when using the "Status" pre-filter.

How does this work with existing settings?

These updates add new filters and filter options to the Family Phonebook Report (FAM-2) and Families Email List Report (FAM-3).
