

# Release Notes

## Updates to Billing Schedule Override Menus

### General Overview

The purpose of this task is to improve the user-friendliness of the Billing Schedule override menu when creating class enrollments.

iClassPro has several different views for creating class enrollments throughout the application. At this time, the option to apply a billing schedule override does not use consistent verbiage across all of these views.

To maintain consistency across the Office Portal and Customer Portal/Mobile App, we will be updating all of these views to use the following verbiage:

- "No Override (Billing Schedule Name)" will be shown instead of "Default"
- "Override To [Billing Schedule Name]" for be shown for override options

### How will this benefit me?

By bringing consistency across the UI everywhere that Billing Schedule override options are displayed, this will reduce confusion and ensure that staff members and customers always see the same options no matter where the enrollment is being created.

### Where will I see these changes?

These changes will affect the Office Portal and Customer Portal/Mobile App (if the option to 'Allow Visitors To Override Default Billing Schedule' is enabled under Settings > Customer Portal > Other Settings > Class Registration).

## What is being changed/added?

iClassPro will be updating all of the views where the Billing Schedule override menu is displayed to use the following verbiage:

- "No Override (Billing Schedule Name)" will be shown instead of "Default"
- "Override To [Billing Schedule Name]" for be shown for override options

## How does this work with existing settings?

This update does not add any new settings or change existing settings; it is simply an update to how specific items are displayed on the Billing Schedule override menu.
